

HAMMAD RASHEED

Full Stack Web Developer

hamdii4292@gmail.com • +92-315-5479265 • Pakistan • github.com/hamdii4292

PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer and Software Engineering undergraduate with hands-on experience building end-to-end web applications using modern front-end and back-end technologies. Proficient in JavaScript, Python, Django, Node.js, Express.js, and REST APIs, with solid experience in both SQL and NoSQL databases. Adept at designing responsive UIs, integrating databases, and deploying full-stack applications. Eager to contribute to production-grade web development projects and grow within a collaborative engineering team.

TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Design, REST API Integration
- **Back-End:** Node.js, Express.js, Django, Python, REST APIs
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Jupyter Notebook, Google Colab
- **Concepts:** Full-Stack Architecture, MVC Pattern, CRUD Operations, Form Validation, Authentication Flows
- **Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Communication

PROJECTS

Student Management & Academic Portal

2025 – Present

Final-Year Capstone Project

- Designing and developing a full-stack web-based portal for student registration, result tracking, and academic management.
- Building the back-end with Django including custom user authentication, role-based access control, and REST API endpoints.
- Creating a responsive front-end dashboard using HTML, CSS, Bootstrap, and JavaScript for students, lecturers, and admin roles.
- Integrating a PostgreSQL database to manage student records, course enrolments, and grade data.

Tech Stack: Django, Python, PostgreSQL, Bootstrap, JavaScript, REST APIs

Simple Login & Registration System

2025

- Built a full-stack authentication system with a front-end HTML/CSS/JS registration and login form with client-side validation.
- Developed a Python back-end to handle form submissions, hash passwords securely, and store/retrieve user records in SQLite.
- Implemented session handling and basic error feedback, demonstrating understanding of the full request-response cycle.

Tech Stack: HTML, CSS, JavaScript, Python, SQLite

Personal Portfolio Website

2025

- Developed a fully responsive personal portfolio using HTML5, CSS3, Bootstrap, and JavaScript with smooth scroll and animations.
- Structured into modular sections (About, Skills, Projects, Contact) with a mobile-first design approach.
- Deployed to GitHub Pages and managed the full development lifecycle using Git version control.

Tech Stack: HTML5, CSS3, Bootstrap, JavaScript, GitHub Pages

Student Result Calculator

2025

- Created a Python console application that accepts student marks, computes averages, assigns grades, and manages records via file I/O.

- Applied functions, loops, conditionals, and file handling — demonstrating clean code structure and reusability.

Tech Stack: Python

EXPERIENCE

Full Stack Web Development Practice | Independent Learning

2025 – Present

- Built multiple full-stack mini-projects integrating front-end UIs with Python/Node.js back-ends and relational databases.
- Completed The Web Developer Bootcamp (Colt Steele, Udemy) covering HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB.
- Practised REST API design, database schema design, and connecting front-end forms to back-end logic.
- Managed all personal projects using Git and GitHub, including branching, committing, and code review workflows.

Software Engineering Labs & Group Projects | University of Haripur

2024 – Present

- Delivered hands-on lab work in C++, Python, and web technologies including database queries, algorithm implementations, and web pages.
- Collaborated on group assignments involving code sharing, peer review, and structured software design applying OOP and design patterns.
- Completed modules in UI/UX design, software testing, and system analysis — directly applicable to full-stack product development.

EDUCATION

B.Sc. Software Engineering | University of Haripur, Pakistan

2023 – 2027

- Relevant Coursework: Data Structures & Algorithms, OOP, Software Design Patterns, Database Systems, Web Engineering, Operating Systems, Computer Networks, Software Project Management.
- Final-year capstone project: full-stack student management and academic portal (Django + PostgreSQL).

CERTIFICATIONS

- The Web Developer Bootcamp – Colt Steele, Udemy (HTML, CSS, JS, Node.js, Express, MongoDB)
- Python for Everybody – Dr. Chuck, Coursera (University of Michigan)
- Version Control with Git – Atlassian, Coursera
- Introduction to Databases and SQL – Meta, Coursera
- Responsive Web Design – freeCodeCamp
- JavaScript Algorithms and Data Structures – freeCodeCamp

LANGUAGES

- Urdu – Native
- English – Fluent (Professional)
