

HAMMAD RASHEED

hamdii4292@gmail.com | +92-315-5479265 | Pakistan

PROFESSIONAL SUMMARY

Motivated Software Engineering undergraduate with a strong foundation in full-stack web development, database management, and software design principles. Experienced in building functional web applications and academic projects that demonstrate practical programming ability. Eager to contribute technical skills to real-world software solutions while continuing to grow within a professional development environment.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML, CSS, SQL

Web Development: Django, Node.js, Express.js, Bootstrap, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, SQLite

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Communication

EDUCATION

Bachelor of Science in Software Engineering | *University of Haripur* 2023 – 2027

- Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Design Patterns, Database Systems, Web Engineering, Operating Systems, Computer Networks, Software Project Management
- Developing a final-year project focused on a web-based student management and academic portal system
- Actively engaged in lab-based modules including software testing, UI/UX design, and system analysis

EXPERIENCE

Self-Taught Web Development Practice | *Independent Learning* 2025 – Present

- Learned HTML, CSS, and JavaScript through online tutorials and built several small practice websites from scratch
- Followed beginner-friendly courses on Coursera and freeCodeCamp to understand core programming concepts and web basics
- Practiced Python scripting through exercises and small automation tasks as part of university assignments and self-study
- Used Git and GitHub to manage and track code for personal practice projects

University Lab & Academic Work | *University of Haripur* 2024 – Present

- Completed hands-on programming labs in C++, Python, and web technologies as part of the Software Engineering curriculum
- Worked on group assignments involving basic database queries, simple web pages, and algorithm problems
- Participated in team-based academic tasks, practising collaboration, code sharing, and peer review

PROJECTS

Personal Portfolio Website | *Personal Project* 2025

- Built a simple personal portfolio website using HTML, CSS, and basic JavaScript to showcase skills and contact information
- Designed a clean and mobile-friendly layout using Bootstrap with separate sections for About, Skills, and Projects
- Uploaded the project to GitHub and practised using version control throughout development
- Tech Stack: HTML, CSS, Bootstrap, JavaScript

Student Result Calculator | *University Assignment Project*

2025

- Developed a Python-based console application to input student marks and calculate grades, averages, and pass/fail status
- Applied basic programming concepts including loops, functions, conditionals, and file handling to store and retrieve records
- Presented the project as part of a semester assignment and received positive feedback from the course instructor
- Tech Stack: Python

Simple Login & Registration Web Page | *Personal Project*

2025

- Created a basic login and registration form using HTML, CSS, and JavaScript with simple client-side form validation
- Connected the form to a small SQLite database using Python to store and retrieve user information
- Practised understanding of how front-end forms interact with a back-end database for the first time
- Tech Stack: HTML, CSS, JavaScript, Python, SQLite

CERTIFICATIONS

- The Web Developer Bootcamp – Colt Steele, Udemy (Free Audit Available)
- Python for Everybody – Dr. Chuck, Coursera (University of Michigan)
- Version Control with Git – Atlassian, Coursera
- Introduction to Databases and SQL – Meta, Coursera
- Responsive Web Design Certification – freeCodeCamp
- JavaScript Algorithms and Data Structures – freeCodeCamp

LANGUAGES

Urdu – Native | English – Fluent (Professional)
